

## Turn Energy Into Intelligence

Connected Living

Creating an energyaware home that can automatically alert us when electricity is wasted, highlights time-of-use rates, and informs when appliances need attention. emerald EMS is reshaping our experience with energy!

### The User

#### Householder

Supporting homeowners see and control their electricity use and usage patterns, and reduce electricity bills.

### Technology

#### Electricity Advisor

Simply connect the Electricity Advisor to a Smart Meter, and emerald EMS will automatically start tracking electricity usage in real-time.

### Energy Intelligence

#### emerald EMS app

- Full oversight of household electricity usage
- A visual representation of how electricity is being used
- Energy calculator to set electricity saving goals
- Alerts to keep you on track to reach energy-saving goals

### Save Money & Energy

#### By tracking & measuring electricity

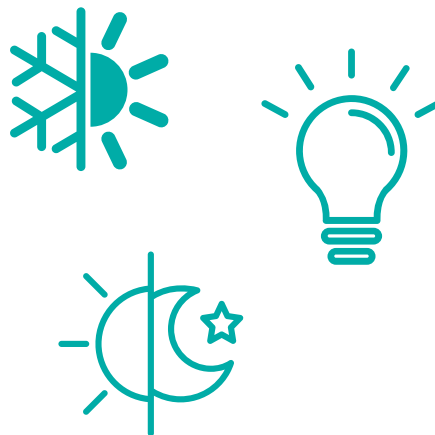

- Understanding how much electricity a home is using
- Stops bill surprises by making informed decisions
- Goals give you targets for improvement

### Take Command

#### emerald EMS future

- Smart Actions: scheduling & remote control
- Shift Loads: run appliances at cheaper times
- New energy saving installation opportunities
- Compatible with smart home assistant devices
